RULES OF BLOKS3

The **basic goal** of BLOKS3 is to fit as many of your pieces on the board as possible.

Generally, **you only must know**, that each new piece must touch at least one other piece of the same color, but only at the corners. Pieces of the same color can never touch along a side.

For **detailed rules** click the buttons below and look at the rule books.
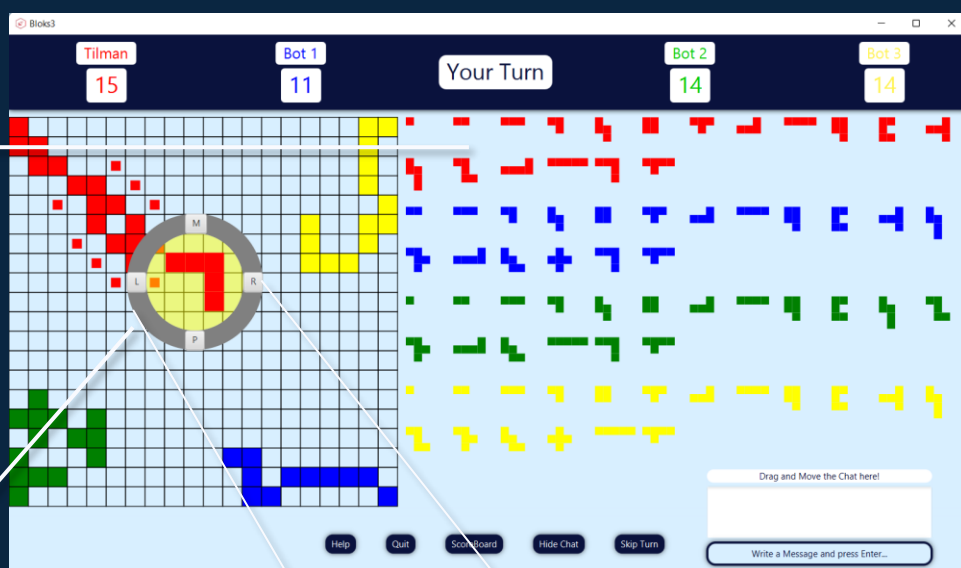

| Classic	Duo	Junior	Trigon

PLAY THE GAME

Make your move:

1. Click on the polygon you want to place on the board.

2. Bring it in the right position through rotating and mirroring.

3. Place it through drag and drop on right spot (possible docking points are shown). A valid position is displayed with a yellow backround.

4. To change the poly you are placing press escape.

5. Enter your move with a click on P or with pressing space or enter.

Control with mouse clicks:

Mirror

Turn Left

Turn Right

Place Polygon

USABILITY TIPS

Unfortunately in game you only receive chat messages when it's not your turn.

If you can't make any turn any more, the game skips automaticly for you.
